SKILLS

Technical: React, Redux, Ruby, Rails, JavaScript, SQL, HTML, CSS, SQL, MongoDB, Express, Node.js, ChyronHego Lyric X, Nexio, Playlist and Motion

Language: Native in Japanese

EDUCATION

AppAcademy, New York, NY

Jan 2020 - May 2020

Rigorous 1,500 hours full-stack web development course with less than 3% acceptance rate

Queens College, City University of New York, Queens, NY

Sept 2014 - Dec 2015

Bachelor of Arts, *cum laude* (GPA: 3.53), in Media Studies

PROJECTS

Catflix | Ruby on Rails, React, Redux, HTML, AWS, CSS

[live](#) | [github](#)

A full-stack, cat-themed Netflix clone made for viewers who love cat shows and movies

- Leveraged AWS S3 for video and image storage imposing a file size limit and file compression to reduce latency and storage cost.
- Implemented a debounced search feature that lets users search videos in optimal time.
- Engineered custom backend and frontend user authentication by utilizing Rails' active record query and Redux's frontend state to enable a personalized CRUD functionality, such as a watchlist for each user.

Tipsy Painter | MongoDB, Express, ReactJS, Node.js

[live](#) | [github](#)

A live-camera, collaborative drawing application where users can sip wine and paint on the same canvas together

- Incorporated git workflow as a back and frontend flex developer in a team with three other developers.
- Fetched data from MongoDB by utilizing axios library and express.js to enable features such as unique painting rooms for each user, and "create a new room" and "join room" functions.
- Utilized socket.io to create an instant connection between backend and frontend to enable real-time canvas and video updates.

Gourmet | Javascript, D3.js, HTML/CSS

[live](#) | [github](#)

An interactive website where users can learn how Michelin star restaurants are distributed across different U.S. regions

- Practiced D3.js's transitions to create animation on bar- and bubble-graphs with selectors.
- Handled HTML DOM events with D3.js's selections to enable the bubble-graph to reveal cuisine types so users can have a more interactive experience.

EXPERIENCE

SonicInVision INC., New York, NY

Technical Director for TV Japan and NHK World

Feb 2016 - Jan 2020

- Managed incoming program content via terrestrial (fiber and IP) and satellite.
- Maintained content quality and organized content air dates and times.
- Ensured that closed caption subtitles comply with US video accessibility laws.
- Created open captioning for channel broadcasting feeds to announce program changes and other information.
- Edited raw footage to localize content for North American and Hawaiian subscribers.
- Adjusted TV content to adhere to video-on-demand broadcasting requirements.
- Trained 20+ employees and created server and software manuals that saved SonicInVision INC. \$15,000.
